The current VolWheel app was actually written for Arch Linux, and ported to Ubuntu with a quick .deb hack. It is old, if I'm honest I'd like to replace it as quickly as possible.

If anyone has any suggestions for a different volwheel app, i'd be eager to hear them.

You could try

<http://www.pcbypaul.com/software/absvolume.html>

or

<http://sourceforge.net/projects/gvolwheel/>

john

gvolwheel is perfect, exactly what I've been looking for. I've just built it and am now adding it to the repository.
